

## RFR Solutions AB

Doing Business with Big Science

#### RFR Solutions at a glance

- RFR Solutions develops and manufactures solutions in stainless steel for customers with high requirements.
- Full support from initial idea to tested, documented and installed product.
- Stainless steel specialists
- A complete, 10,000 m<sup>2</sup>, manufacturing facility free from carbon steel
- Primarily serving the Nordic market
- Landskrona and Lund

## Key industries

#### Different forms of cooperation:

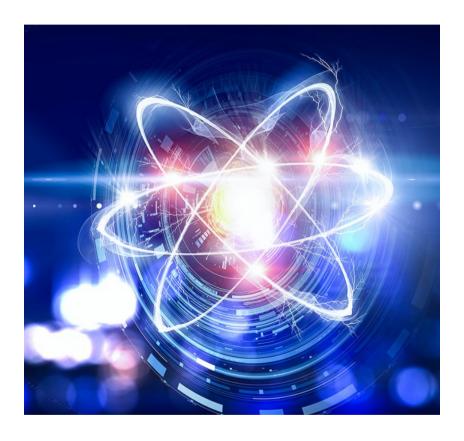

- **R&D Projects**
- Projects, including manufacturing and installation
- Components or modules

### Pushing the boundaries

- Cooperation with scientists from leading universities
- Equipment for top research facilities such as Max IV, ESS and CERN
- Making the impossible possible
  - Extreme conditions
  - Very high precision

**Big Science** 

### Support from start to finish

- Design support
- Selection of materials
- Specialized production techniques (no magnetization, high temperatures, tolerances, etc.)
- Full range of tests available in cooperation with accredited laboratories
- Complete documentation

## Examples

- Cryogenic equipment
- Containments for radioactive environments
- Stands and support structures

#### **Big Science**

#### How to get started?

- Select inquiries that feels realistic
- Get references
- Watch out for prototypes
- Reasonable commercial conditions
- Manufacture, possibly serial production
- Take the next step with larger and more complex projects

# Thank you
